Conventional Pest Control

In this process pesticides have been used for improving environmental quality to live in, various kinds of pesticides are used to control pests.

Electronics Pest Control

It is the process in which electronics & electrical instruments are used to inspect, detect, control, eliminate, the targeted pests.

Fumigation/Export Certification/IPPC Certification/ISPM-15/HT

(With Aluminum Phosphide & Methyl bromide)

This package is mainly for export industries. We provide fumigation with Aluminum Phosphide & Methylbromide (for export purposes only). We also provide Heat Treatment of Wooden Packaging. It also includes container fumigation, wooden packaging fumigation. We have got accreditation from Govt. of India and Australia.

Royal Treatments (Odorless & Un-destructive treatment)

This package is developed for royal personalities. The new molecules are used to control the pests. The complete process is odorless, stainless & without any destruction.

Green India (Herbal treatments)

We have our R & D center at Yamunanagar. Where we had developed many herbal & conventional recipes for pest control operations. Some are the best alternative for allergic peoples. These recipes are under patent & registration process. As a result, technology have been developed to use herbs for pest control.

Fogging (Odorless & long duration effect)

We use modern chemical for fogging which deliver odorless & long duration effects.

Termifree (Odorless & without drilling Anti-termite Treatments)

We have developed process for anti termite treatments for pre & post construction which delivers best quality without destruction.

Pestmines (Mines system for rats, snakes, lizards etc.)

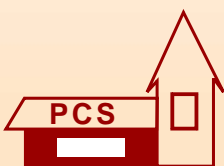

This is just like process to install mines. We have developed process & herbal chemicals which have repellent action against rats, snakes, lizards, mosquitos etc. This package deliver excellent results in combination with other packages.

IPM (Cost effective preventive & curative treatments.)

This is one of the best discipline in the field of Pest Control, IPM (Integrated Pest Management) is a common sense way for businesses to address pest. This method of pest control offers sound solutions, which focus on three key techniques : 1) Inspection, 2) Identification, 3) Preventive Measures, 4) Treatments.

In the other words Integrated Pest Management (IPM) is the coordinated use of pest & environmental information with available pest control methods to prevent unacceptable levels of pest damage by the most economical means and with the least possible hazard to people, property and environments.

Inspection : We also provide inspection report of the plant / premises in view of Pest Controls on the requirements of our valueable clients.
